

## UNDER VEHICLE SURVEILLANCE

3000P  
3100P

### Applications

- Airports
- Embassies
- Government Buildings
- Prisons
- Military zones
- Seaports / Customs
- Border control

## RADIATION DETECTION

i-SCAN 3910  
i-SCAN 3920

Based on high sensitivity, fast response, automatic data storage and snapshot technology, it is widely used in customs, borders, ports, metal smelting enterprises and recycling industry

## TRACE DETECTION

Mini Explonix Explonix [ 300 ETD]

- Portable Explosive & Radio Active Materials Detection
- Detects all explosives down to nanogram level
- Detects all non-volatile explosives
- Analysis time: apprx 1 second
- Ready to operate between 5 and 18 seconds after switch on
- Wi-Fi module incorporated for full remote control/data acquisition

## ACCESS CONTROL

SilkBio- I OOTC is the first ever Time & Attendance and Access Control Terminal to be associated with SilkiD fingerprint reader, face recognition and FRID card functions. With the new SilkiD fingerprint reader, the operation remain stable under strong light source and high preciseness of verification of wet and rough fingers.

With latest facial algorithm and the innovation features, Silkbio- I OOTC is bringing you the whole new experience in the fields of physical security and information security, access control is the selective restriction of access to a place or other resource. You can manage over 3000 employee attendance and resource access with our technology.

We are small  
enough to care  
about your business.  
But big enough to  
do your job.

## Security Barriers

With these barriers, they control crowds at places they are placed, this can be for security checkups or for payments, these can be set to be Exit only or Entrance only.

We are small  
enough to care  
about your business.  
But big enough to  
do your job.

## Boom Gates

A boom barrier, also known as a boom gate, is a bar, or pole pivoted to allow the boom to block vehicular access through a controlled point. Typically the tip of a boom gate rises in a vertical arc to a near vertical position. Boom gates are often counterweighted, so the pole is easily tipped.

We got these in different materials, shapes, designs and with different technology schemes, designed to fit your needs.
